<p>Kommentar: -- Photo by Nick Dean !! -- Alaska Airlines flight AS1282 (N704AL) experienced a rapid decompression at FL160 after loss of the left mid-after deactivated emergency door and interior sidewall panel. The flight made an emergency decent and a safe return to Portland International Airport (PDX/KPDX).</p> <p>Update 06.01.2024: Alaska Airlines is temporarily grounding all 65 Boeing 737 MAX 9 aircraft. The planes will receive further safety inspections.</p>
